Detection Method

On Wednesday 1/13/2016 Stratus Helicopters conducted an aerial survey of the Hidden Valley Lake area. We flew a grid type pattern at altitudes of 3-5 hundred feet above ground. By utilizing a helicopter we are able to fly at varying speeds and altitudes. We used two spotters to visually inspect the area and count the white-tailed deer.

Demographics

Most of the deer spotted were in the northern area of the property. The largest group of deer was located in Zone 19 with 11 deer in the group. Zones 14 and 18 were also noteworthy

| 27 Zones - 118 Total Deer | | | | | |
|---------------------------|--------|---------------|----------------|--------|-------------------|
| 1 = 3 | 7 = 3 | 13 = 2 | 19 = 11 | 25 = 4 | Totals |
| 2 = 4 | 8 = 1 | 14 = 9 | 20 = 4 | 26 = 2 | N. West-43 |
| 3 = 6 | 9 = 5 | 15 = 3 | 21 = 4 | 27 = 2 | N. East-29 |
| 4 = 2 | 10 = 5 | 16 = 5 | 22 = 5 | | S. West-13 |
| 5 = 3 | 11 = 4 | 17 = 5 | 23 = 5 | | S. East-33 |
| 6 = 4 | 12 = 4 | 18 = 9 | 24 = 4 | | |
